Hybrid Operating Room

Team training course

Philips and The Center for Advanced Medical Learning and Simulation (CAMLs) are offering the first team training course specifically developed for the Hybrid Operating Room.

Course Directors:
Karl A. Illig, MD
Professor of Surgery
Director, Division of Vascular Surgery
University of South Florida

Fadi Matar, MD, FACC, FSCAI
Clinical Assistant Professor of Medicine
Director, Cardiac Cath Lab
Tampa General Hospital

This two-day course provides training in the only state-of-the-art, fully-functional hybrid operating room in the world dedicated to education and training. Investing in training up front can assist in the reduction of common medical errors, enhance patient outcomes, and achieve higher output for your hybrid operating room.

Course summary:
CAMLs interprofessional team training curriculum delivers procedure-based workflow training incorporating Hybrid OR concepts, practical exercises and radiation safety training. This course provides the unique opportunity for the interprofessional team to practice their skills to become a high-performance team in both endovascular and cardiovascular cases, including radiation safety.
Teamwork
Teamwork is the key word in working in this fast-paced, complex environment. CAMLS provides instruction on teamwork principles, efficient room setup, communication skills, patient positioning, and procedure workflow for all members of the Hybrid OR team.

Team members suggested for the training
Surgeon
Interventional Cardiologist
Interventional Radiologist
Anesthesiologist
Circulating Nurse
Scrub Tech
Radiologic Technologist

Learning Objectives
Upon completion of this course in the Hybrid OR, the learner should be able to:

- Demonstrate efficient and effective set up for elective and emergent procedures as a team in the Hybrid OR
- Demonstrate efficient and effective transition from non-invasive to open surgical procedures as a team
- Demonstrate radiation safety and live dose monitoring practices when performing cases
- Demonstrate team awareness and communication during the performance of procedures, including team awareness in the use of fluoroscopy
- Express increased confidence in your ability to perform elective and emergent procedures as a team in the Hybrid OR
- Express increased confidence in your ability to transition to open surgical procedures in the Hybrid OR
