Ultrasound Guided Peripheral Vascular Access

In today’s competitive and dynamic healthcare climate, it is critical to use your medical imaging systems to their fullest potential. Our goal at Philips Healthcare is to provide the clinical education you need to make the most of your equipment investment.

**Philips Ultrasound Point of Care POC 116**

This Philips Clinical Education workshop is designed for individuals looking to develop a cognitive and technical understanding of ultrasound guided peripheral vascular access. It focuses on delivering the knowledge and practical skill for obtaining ultrasound images of the peripheral venous vasculature and the various approaches for needle access.

The course includes a lecture and a hands-on scan workshop where attendees will be able to perform ultrasound guided needle access on peripheral vascular phantoms.

**Prerequisite**
Must be a physician, nurse, medical student or qualified sonographer.
Ultrasound Guided Peripheral Vascular Access (POC 116)

Course Objectives
Upon completion of this course, the learner should be able to:
• Discuss the benefits of ultrasound guided peripheral vascular access
• Review upper extremity venous anatomy
• Explain the optimal vessel parameters for ultrasound guided vascular access
• Discuss basic ultrasound principles, instrumentation and vascular imaging
• Explain the procedure of ultrasound guided vascular access
