

**PHILIPS**

Clinical Education

## Philips Ultrasound EPIQ and Affiniti Annotations

Our goal at Philips Healthcare is to provide the clinical education you need to make the most of your equipment investment. Virtual instructor-led training (vILT) events use a robust online classroom platform that is specifically designed for highly-interactive, live online learning.

### **Philips ultrasound general imaging 103VILT**

#### **About virtual instructor-led training**

Virtual training is a facilitator-led, live online learning event that is delivered in a virtual environment. Participants can be geographically dispersed and also individually connected. Each learner uses their own computer or other compatible device. Virtual training is synchronous, meaning that participants are connected at the same time as the

facilitator. Philips virtual training events typically range from 60-120 minutes in length with a maximum of 10 participants. This socially engaging, purposefully-designed training allows participants the same quality education of an instructor-led classroom without the need or expense of traveling.

# Philips Ultrasound EPIQ and Affiniti Annotations (GI103VILT)

## Course description

This one hour Virtual Instructor Led Training (vILT) course is designed to provide customers knowledge for customizing annotations on their EPIQ or Affiniti ultrasound system. The course topics will include annotation options available in the system set-ups menu, the touch screen and keyboard. Body Marker menus will also be covered in this course. This course is intended for sonographers and system super-users who require additional knowledge of system customization of annotations.

## Course objectives

Upon completion of this course, the learner should be able to:

- Discuss touch screen and keyboard annotation
- Describe annotation setup menus
- Identify the annotation applications available
- Demonstrate how to add, modify, create new and remove annotations
- Discuss the body marker applications available

## Prerequisite

A thorough knowledge and understanding of system instrumentation is required for this program.

## Audience statement

This course is intended for sonographers and system super-users who require additional knowledge of system customization of annotations.
