Clinical Education

Philips Ultrasound EPIQ and Affiniti Analysis OB

Our goal at Philips Healthcare is to provide the clinical education you need to make the most of your equipment investment. Virtual instructor-led training (vILT) events use a robust online classroom platform that is specifically designed for highly-interactive, live online learning.

Philips ultrasound general imaging 106VILT

About virtual instructor-led training

Virtual training is a facilitator-led, live online learning event that is delivered in a virtual environment. Participants can be geographically dispersed and also individually connected. Each learner uses their own computer or other compatible device. Virtual training is synchronous, meaning that participants are connected at the same time as the

facilitator. Philips virtual training events typically range from 60-120 minutes in length with a maximum of 40 participants. This socially engaging, purposefully-designed training allows participants the same quality education of an instructor-led classroom without the need or expense of traveling.

Philips Ultrasound EPIQ and Affiniti Analysis OB (GI106VILT)

Course description

This one hour Virtual Instructor Led Training (vILT) course is designed to provide customers knowledge for customizing Obstetric analysis packages on their EPIQ or Affiniti ultrasound system. The course topics will include OB specific analysis setup menus, OB measurements and calculations, importing and exporting OB trending data, adding new OB tables and equations and OB authors. This course is intended for sonographers and system super-users who require additional knowledge of system customization of OB specific analysis packages.

Course objectives

Upon completion of this course, the learner should be able to:

- Identify OB specific analysis setup menus
- Describe the analysis applications available
- Relate analysis measurements and calculations
- Discussed importing and exporting of
- Obstetric Trending data
- Review how to add new
- OB tables and equations

Prerequisite

A thorough knowledge and understanding of system instrumentation is required for this program.

Audience statement

This course is intended for sonographers and system super-users who require additional knowledge of using the system OB analysis packages.
